

Raw Water Policy

Policy

As a water storage manager, SRW shall;

- Maintain and review safe drinking water Risk Management Plans for each of SRW's storages that provide raw water to water suppliers, and implement actions to mitigate the risks identified within those plans
- Engage regularly with stakeholders from the catchment and water suppliers to promote a coordinated approach to managing risks to drinking water
- Report any identified or suspected issues with raw water quality to stakeholders in a timely manner
- Maintain effective contingency and incident response procedures
- Provide training and support for all SRW staff involved in the supply and management of raw water, including identification of water quality incidents, notification protocols and sampling regimes and requirements.

Definitions

Water storage manager – as defined by the *Safe Drinking Water Act 2003*

Reporting

- SRW will prepare a Water Storage Managers Report in accordance with the Safe Drinking Water Act 2003 and associated Regulations and Guidance Note issued by the Department of Health and Human Services annually.
 - SRWs risk management plans will be externally audited against the Safe Drinking Water Act 2003 and associated Regulations when required by the Department of Health and Human Services.
 - In the case of a non-conformance or breach of requirements under the Safe Drinking Water Act 2003, the Managing Director will be immediately notified and will report to the Board.
-

Effective date and review date	<p>This policy takes effect on 2 February 2016.</p> <p>It is due for board review in September 2020.</p>
Who is affected	<p>This Policy applies principally to staff involved in the operation, maintenance and management of SRW's drinking water storages. The Policy also applies to contractors conducting works on behalf of SRW at drinking water storages</p>
Rationale	<p>SRW is defined as a water storage manager under the Safe Drinking Water Act 2003. It supplies raw water to water suppliers from five of its major storages. SRW maintains safe drinking water Risk Management Plans for each of the storages, as required by the Act and associated Safe Drinking Water Regulations 2015.</p> <p>This Policy demonstrates SRWs commitment to its role as a water storage manager as defined by the <i>Safe Drinking Water Act 2003</i>.</p>
